Justflick : Hello I am Arnav and we have created a program to determine energy savings

Anda : Hello I am Anda

Jivesh : Hello I am Jivesh

Saket : Hello I am Saket and I am The Team Leader(will answer all questions asked by the judges)

Justflick: In this program we can enter the appliances we use and the watts of energy they use per hour if this field is unfilled it can also take the default values in the program We have to enter the money used per kwh of power on regular electricity and on Renewable Energy Source This program was made in python using a library called tkinter which allows us to make GUI this project is open source also so if you encounter any problem or

you want to add/remove anything you can directly access the python code if you allow us then we can also show a demo
